

UPGRADES/ACCESSORIES

REDESIGNED WITH SEALED TANK FOR BETTER HYGIENE

The Wave

Large space for towel and soap dispensers. Dispensers from Satellite optional

Designed for back to back configuration as well as free-standing

Two wash basins in each handwash station

Sealed fresh water tank for improved hygiene

Vandal resistant design

Large handles for easy lifting and maneuvering

Photo shows two stations back to back with optional umbrella

"Hands-free" foot operation

The redesigned Wave has even more to offer with its sealed fresh water tank for added hygiene. The sealed tank allows you to use chlorine tablets to kill harmful bacteria that may be living in water, helping protect you and the public from harm.

When you have a special event, make sure the "Wave" is invited. Designed to stand alone or back-to-back with another unit, event organizers will appreciate the function, design, and improved sanitation offered by this unit.

The Wave is designed to give you the option of attaching your own towel and soap dispensers, or purchasing them with the unit. Larger handholds have been molded into the sides of the unit to make loading and maneuvering this versatile wash station easier. Operating and using the Wave is simple and effective due to its large basin and hands-free foot pump. The washbasin has ample room for fingertip to elbow washing and the recessed foot pump delivers an immediate stream of water to users.

Imagine The Possibilities...

EASY TO MAINTAIN, EASY TO USE.

"The Wave" is a sleek, compact, fully enclosed wash station with a rugged vandal resistant design.

The rugged flip up hood makes pumping and refilling a breeze.

The second hood provides flip up access to waste water reservoirs for complete sanitation.
