Comfort. Privacy. Mobility.

The HIGHRISE™ offers comfort, privacy and greater mobility at a time when construction companies are interested in all three.

The HIGHRISE has an internal urinal and optional retractable roof, offering users complete privacy. More and more, companies want this option and now you can provide it.

Moving a restroom from floor to floor has always been a challenge, until now. With a retractable roof and sealed, greasable casters, the HIGHRISE will fit easily into freight elevators, through doors and roll through the worst dust.

Have the HIGHRISE in your fleet and a whole new market will open up to you.

When you want to move the HIGHRISE, fold down the roof and hinged door and roll it to the next location. It easily fits through door frames and onto freight elevators.
